

Turning the Inside of the Bowl: continued

2. Sand (3" disk) and texture the inside of the bowl while on the lathe. If you prefer to have softer rounded edges versus the three points now is the time to sand them, I recommend hand sanding the edges to avoid damage.

Finishing the Bowl:

Remove bowl from lathe and apply finish of your choice. I apply a mixture of 1/3 pure Tung oil, 1/3 polyurethane and 1/3 mineral spirits to the bowl. I let it dry overnight and then lightly sand with 600 grit sandpaper. The next day, I apply a second coat and let it dry overnight. I finish by buffing the bowl and applying a coat of wax.
